

WOLF TOWN

Technical Specification

We really appreciate our tech and audio engineers and we know that sacrifices must be made under certain circumstances. This document outlines Wolftown's preferred technical configuration so that we can manage our own monitors and provide the best show possible. When the sound is good, the vibe is also good which typically results in good music and happy customers.

The Wolftown Band is a simple 4-member rock band that consists of:

Sam Lowe – *Rhythm Acoustic & Electric Guitar + Lead Vocals*

Gear: Acoustic with a built-in pickup, Fender Telecaster, Fender Hotrod Deluxe

Zeek Shifflett – *Lead Electric Guitar*

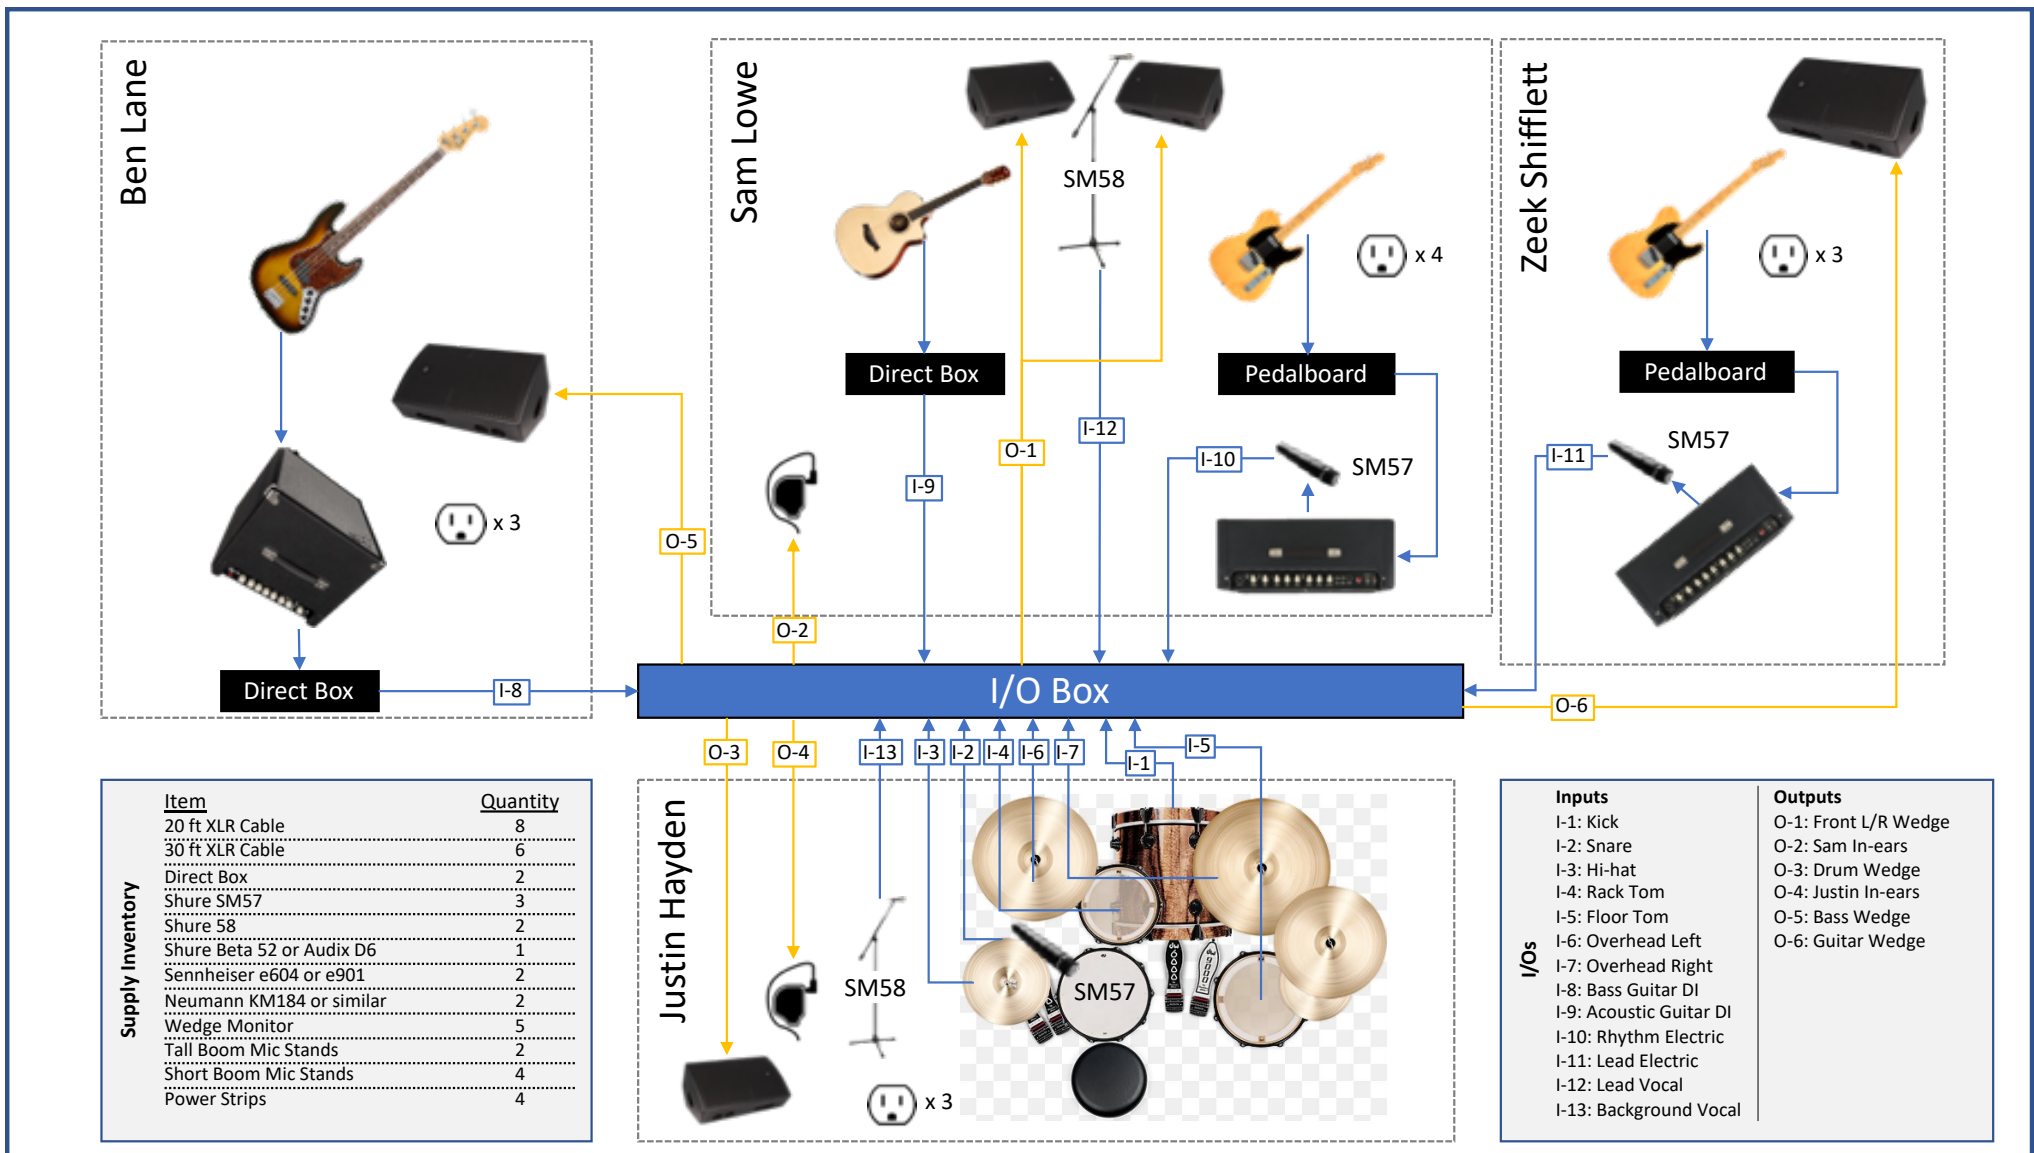

Gear: Fender Stratocaster, Fender Telecaster, ??

Ben Lane – *Electric Bass*

Gear: Fender 5-string Jazz Bass, Fender Rumble 500

Justin Hayden – *Acoustic Drums + Background Vocals*

Gear: Yamaha 22 Kick/12 Tom/14 Tom/14 Snare/20 Ride/18 Crash/17 Crash/14 Hi-hats

We will bring a stage rack, which we would normally position on stage next to the drummer. The unit contains a Presonus StudioLive 24R, which we control all our own wedge and in-ears monitors from. This rack has a transformer-isolated passive split for all 24 channels. All direct boxes or mic cables connect to our rack and we will then provide the house with a full 24 channel split for FOH. There is a 7-meter XLR loom to allow connection to house stage boxes etc. We provide all phantom power. If the rack is to be positioned off stage it is important that the production provide all cables and/or sat boxes to allow easy connection to mics on stage.

Wireless Requirements

Wolftown uses wireless in-ear monitoring systems. These all run on radio frequency 606-614MHz (Channel 38). In addition to that, all four musicians and the sound engineer use iPads or Tablets to control their own In-ear monitor mix / Front of House mix respectively. These devices connect to our desk via a wireless router that we will provide. If you wish to assign us a particular Wifi radio Channel please let us know. Please note that our ability to use this Wifi system is a necessity to our show and non-negotiable so please make whatever preparations you must to accommodate this.
